

# Oussama Boutira

Full-Stack Developer

boutiraoussama4@gmail.com • 06 16 15 03 29 • Marrakech •-

<https://www.linkedin.com/in/oussama-boutira/>

## SUMMARY

Full Stack Developer passionate about designing complete web applications, from intuitive user interfaces to high-performance APIs. Specializing in the JavaScript ecosystem (Node.js, Express, React, MongoDB) and workflow automation via n8n. Committed to continuous learning, I am currently exploring the WordPress environment to expand my skillset.

## SKILLS

### Languages:

JavaScript, TypeScript, HTML5, CSS3

### Front-End:

React.js, Next.js

### Back-End:

Node.js, Express.js, REST APIs

### Databases:

MongoDB, PostgreSQL, MySQL, Supabase, Prisma ORM

### Tools:

Git, Postman, VS Code, n8n, Wordpress

## SOFT SKILLS

Passion

Continuous Learning

Problem Solving

Teamwork

Adaptability

## EDUCATION

### Digital Development, Web Full Stack

Jul 2025

ISTA NTIC SYBA MARRAKECH

### Baccalaureate, Physical and Chemical Sciences

Jul 2023

Sidi Youssef Ben Ali High School Marrakech

### Certificate, Full Stack Web Development

Mar 2026

YNOV MAROC CAMPUS

## PROJECTS

### P2P Hotels

Node.js · Express · n8n · PostgreSQL · Supabase · Vercel · Html · Css · Js| [Repository](#) | [Live Demo](#)

To optimize hotel management and data utilization, I designed a full-stack architecture (Node.js/Express) integrating n8n workflows for data extraction and a chatbot. The solution guarantees performance and scalability thanks to a PostgreSQL database (Supabase) and continuous deployment on Vercel.

**Massilya&Papa**

MERN · React.js · Node.js · Express.js · MongoDB | [Repository](#)

To unify the complex management of various rentals (cars, accommodations, leisure activities within Agafay), I designed a centralized platform supported by a secure REST API that manages calendars and transactions. The solution includes an intuitive and optimized administration interface, as well as activity tracking and user management.

**Synchro**

Node.js · React.js · TypeScript · Tailwind · OpenRouter API · Express.js · Prisma ORM · Supabase · Vercel| [Repository](#) | [Live Demo](#)

Collaborating within a five-person cross-functional team, I architected the database and backend infrastructure for Synchro BPMS, a multi-tenant enterprise web application. Working closely with frontend, backend, and DevOps leads in a TypeScript Monorepo (React/Node.js) environment, I designed a robust PostgreSQL schema using Prisma ORM and Supabase. I implemented advanced Row Level Security (RLS) for comprehensive data isolation and utilized flexible JSONB data models, delivering a secure, type-safe, and highly adaptable architecture that seamlessly supported our complex business management requirements.
